

MIND MATRIX PRO

COMPANY PROFILE · BEIRUT · 2026

# Intelligent technology. Simplified business.

We simplify enterprise tech with ERP, CRM, automation, BI and custom solutions tailored for business growth.

AI · DIGITAL TRANSFORMATION  
ERP · AUTOMATION  
CRM · BUSINESS INTELLIGENCE

# We turn complex business processes into intelligent systems.

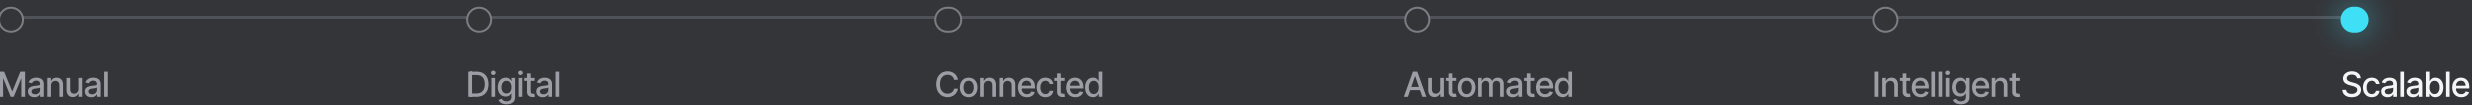

Mind Matrix Pro is a technology and digital transformation company based in Beirut. We build intelligent software, enterprise systems and connected digital workflows that help businesses simplify operations, connect systems and make better decisions.

Mind Matrix Pro connects business, technology and intelligence. We don't just implement technology. We design how technology works for the business.

|                                                                                                                     |                                                                                                                      |                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|

**Also custom software:** web applications, mobile apps, SaaS platforms and enterprise systems, shaped around the process.

THE PATH WE TAKE EVERY BUSINESS ON

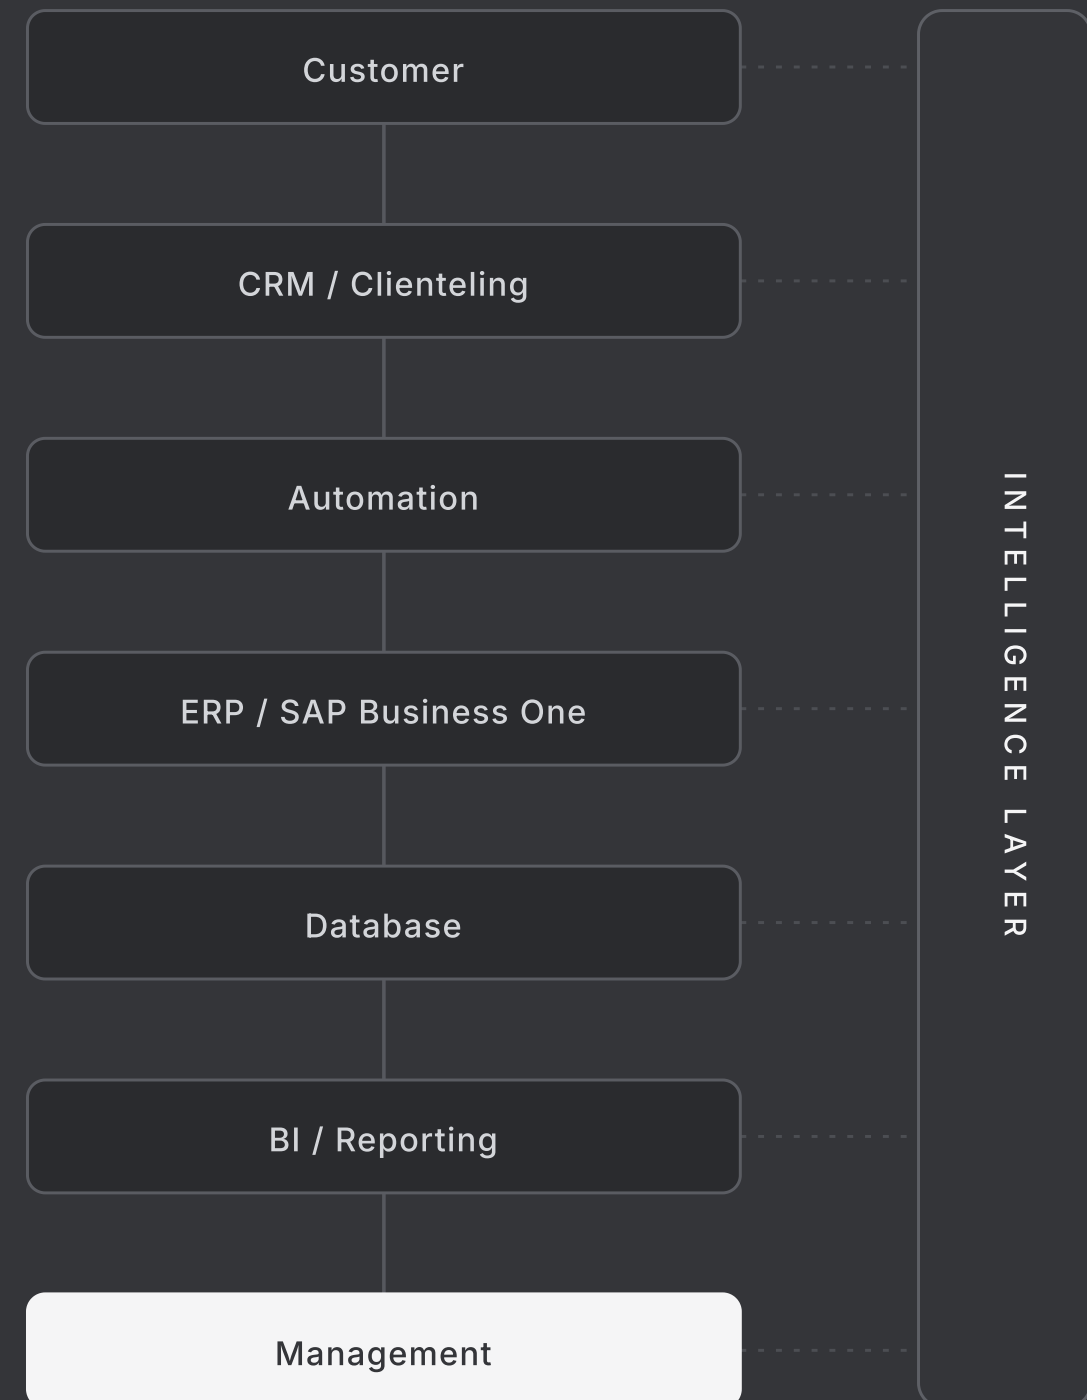

# One ecosystem. Connected business systems.

Most companies run on systems that don't talk to each other. We connect them, so data is entered once and moves correctly from the first customer touch to the management report, with an intelligence layer working across every step.

**ERP is not just software. It is the operating system of the business.**

**Systems we work with:** SAP Business One, Salesforce, SQL Server, Shopify, POS, Power BI, Tableau, Qlik, REST APIs, web and mobile.

Technology names show integration experience, not official partnerships.

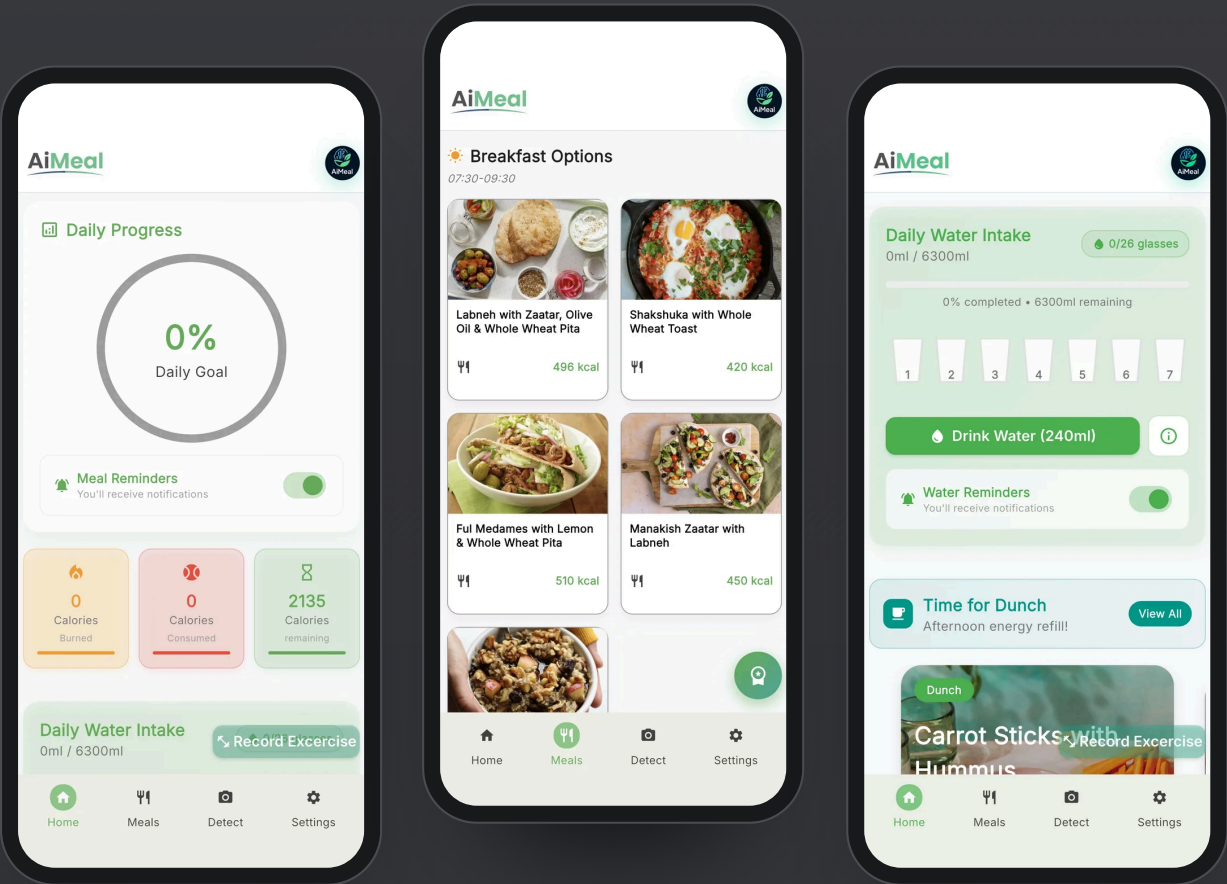

NUTRITION AND WELLNESS APP · IOS AND ANDROID

# AiMeal

Personalized nutrition built around each person's goals, body profile, preferences, lifestyle and dietary needs. Food recognition from a photo, a nutritionist that answers 24/7 and meal plans that adapt.

- Personalized meal plans
- Food recognition
- Nutritionist chat, 24/7
- Custom meal generator
- Exercise and water tracking
- Smart reminders

App Store · Google Play · info-aimeal.mindmatrix.pro

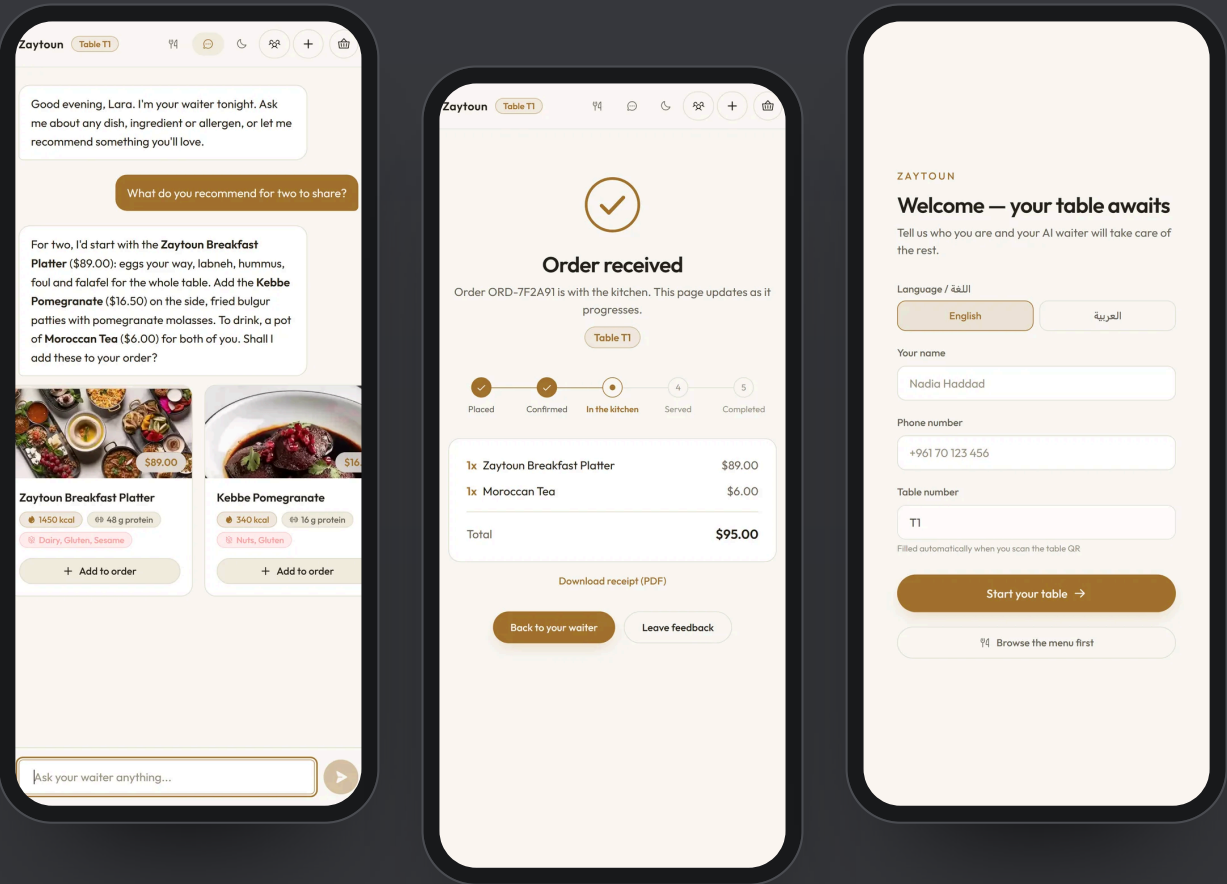

RESTAURANT ORDERING PLATFORM

# Alwaiters

Guests scan the table QR and order through a digital waiter that knows the menu, the ingredients and the allergens, in Arabic, English and Arabizi. Orders flow live to the kitchen; the bill is digital.

- QR table ordering
- Arabic, English, Arabizi
- Ingredient and allergen answers
- Live order workflow
- Restaurant admin console
- Digital bill, optional tipping

aiwaiters.app

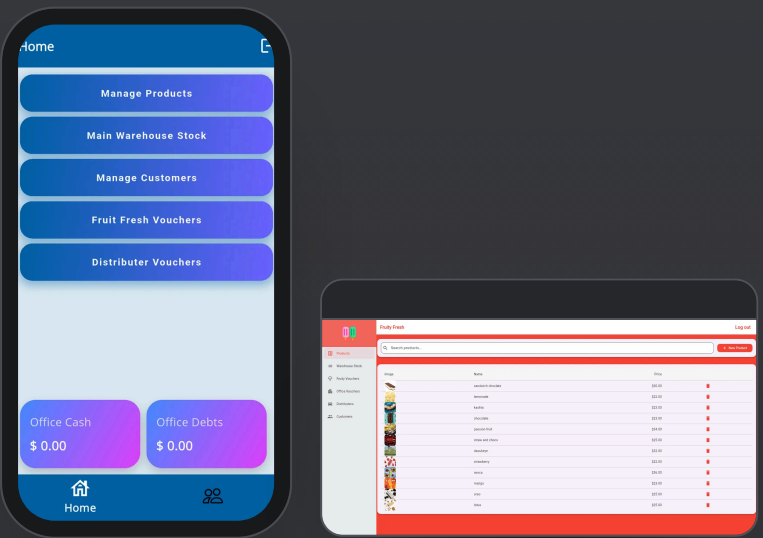

DISTRIBUTION APP · MOBILE AND WEB

Fruity Fresh

End-to-end distribution for a frozen-dessert brand. The office controls products, pricing, stock and distributor allocations from the web panel; each driver runs the route from the phone, sells, collects cash and closes the day with automatic receipts.

|                             |                        |
|-----------------------------|------------------------|
| Admin and distributor roles | Stock per vehicle      |
| POS and vouchers            | Cash flow and debts    |
| PDF receipts                | Reports, expenses, P&L |

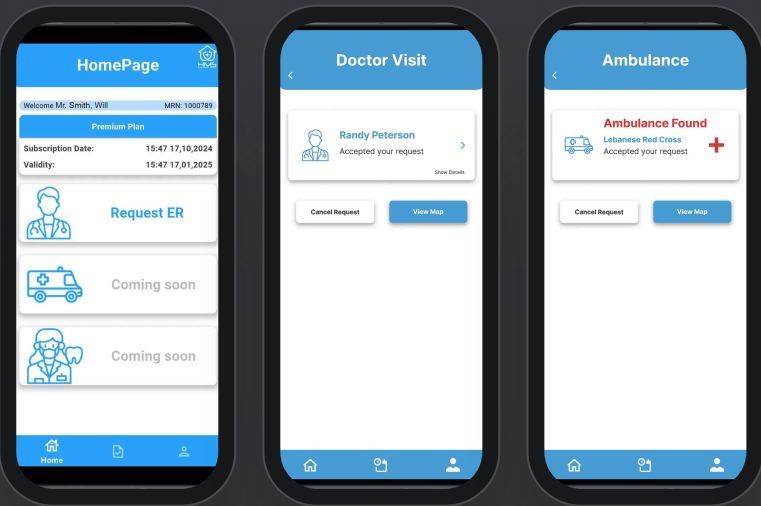

HEALTHCARE APP · BUILT FOR A SOFTWARE COMPANY

HMS Healthcare

Home medical care on demand. Patients request a doctor or an ambulance, follow the request live on the map and keep their visit history. Designed, built and published end to end for a software company serving the healthcare provider.

|                        |                           |
|------------------------|---------------------------|
| Doctor and ER requests | Ambulance with live map   |
| Subscription plans     | Visit history and records |
| Doctor profiles        | iOS and Android           |

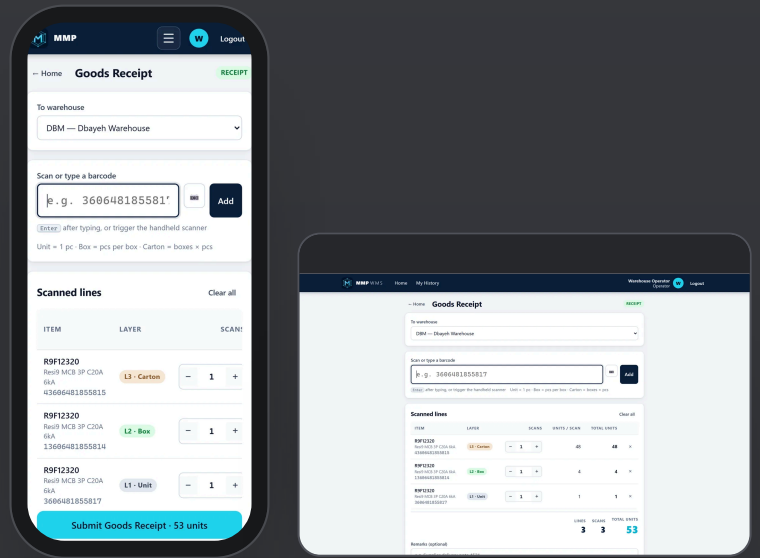

WAREHOUSE MANAGEMENT · CONNECTED TO THE ERP

MMP WMS

Operators scan any unit, box or carton barcode; the system recognises the packaging layer through GS1 rules, counts the pieces and posts the goods receipt, issue or transfer straight to the ERP. Handheld scanners, phones and desktops.

|                          |                         |
|--------------------------|-------------------------|
| Receipt, issue, transfer | GS1 unit, box, carton   |
| Multi-warehouse          | History per operator    |
| SAP Business One, Odoo   | Any ERP through its API |

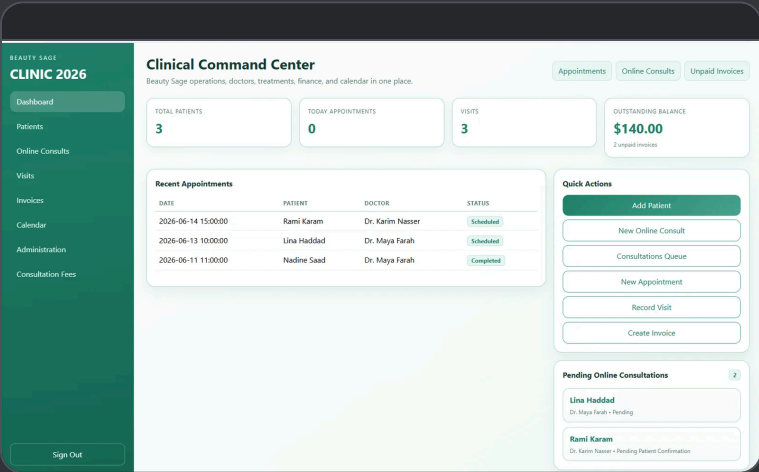

CLINIC MANAGEMENT AND ERP · MULTI-TENANT SAAS

# Clinic platform

One system for a multi-doctor clinic: patients, appointments, online consultations, visits, invoicing and the calendar, with a command-centre dashboard for the owner. Patients book online by region, doctor and specialty; each clinic runs on its own tenant.

|                                      |                           |
|--------------------------------------|---------------------------|
| Booking by region, doctor, specialty | Online consultations      |
| Patients and visits                  | Invoices and balances     |
| Calendar per doctor                  | Roles and tenant settings |

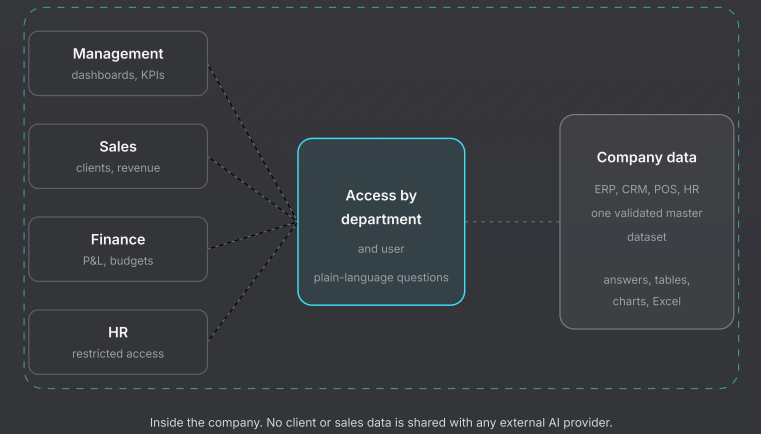

SECURE DATA INTELLIGENCE · ENTERPRISE GROUP

# Ask your data

A private "ask your data" layer. One governed master dataset, and every department talks to it in plain language: top clients, total sales, KPIs, a new dashboard on demand. Same validated numbers for everyone, access by department and user, and the data never leaves the company.

|                          |                             |
|--------------------------|-----------------------------|
| Plain-language questions | Dashboards from master data |
| Tables, charts, Excel    | Access by department        |
| HR data restricted       | No external AI provider     |

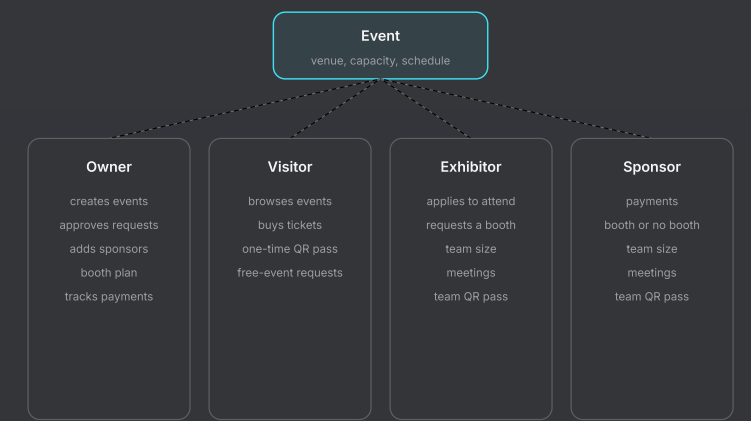

EVENT MANAGEMENT PLATFORM · WHITE-LABEL

# Events, exhibitors and sponsors

One platform for any event, branded for each organiser. The owner creates the event and controls capacity and schedule; visitors buy tickets and enter with a one-time QR code; exhibitors and sponsors apply, request booths, register their teams and schedule meetings.

|                       |                        |
|-----------------------|------------------------|
| Four roles            | Ticketing with payment |
| One-time QR entry     | Booth requests         |
| Team passes, meetings | Notifications          |

# Real processes. Connected digital solutions.

A selection of process solutions we have delivered. Client names, entities and data stay confidential.

|                           |                                                                                      |
|---------------------------|--------------------------------------------------------------------------------------|
| PLM and product lifecycle | Order confirmation → Down payment → Quantities → SAP sync → <b>Delivery schedule</b> |
| Delivery schedule         | Orders → Supply chain → Logistics → <b>ERP</b>                                       |
| Warehouse management      | Inventory → Picking → Delivery → <b>ERP</b>                                          |
| Procurement               | Request → Approval → Purchase order → Receipt → <b>ERP</b>                           |
| Shipment management       | Order → Shipment → Tracking → <b>ERP</b>                                             |
| E-commerce integration    | Shopify → Customers → Orders → <b>ERP</b>                                            |
| Performance management    | Employee → Performance → Evaluation → <b>Reporting</b>                               |
| Retail transformation     | POS → CRM → Clienteling → ERP → <b>BI</b>                                            |

# Whatever the process, build the right system.

|                          |                                  |
|--------------------------|----------------------------------|
| Manual processes         | Workflow automation              |
| Disconnected systems     | API and system integration       |
| Poor visibility          | Business intelligence            |
| Complex ERP processes    | ERP optimization                 |
| Fragmented customer data | CRM and clienteling              |
| A clear AI use case      | Custom AI solutions              |
| A digital product idea   | Web, mobile and SaaS development |
| Growing operations       | Digital transformation           |

BUILD WITH US

## Have a product in mind? We build with partners.

Software companies, agencies and founders bring us a brief or a client; we design, build and run the product, white-label or as a joint venture. Delivery scheduling, project management, approvals, field apps, integrations: anything that digitalizes how a company works.

# Build what's next.

Tell us which process you want to fix. We reply on WhatsApp and email.
